Web Designing and Hosting

The varied range of services we offer, our proven integrity and the experience we have gained over the years means that we are ideally placed to act as a "one-stop shop" for businesses looking to reduce the burden of managing and maintaining their IT resources.

We also offer a consultancy service to provide professional advice on your organization's IT strategy, with the initial consultation of up to two hours free of charge and without obligation.

KabulCyberPark Inc. consultants provide help with assessment, design, installation, management and troubleshooting in the areas of Windows Server, Exchange Server or Active Directory. We can perform a design, a migration or an installation quickly and cost effectively, saving customers time and expense.

KABULCYBERPARK staff members experience with Microsoft spans over 13 years. This ensures that its Microsoft certified Professionals, Technical Architects, Engineers and Trainers have prompt and direct access to Microsoft services and in-depth access to exclusive resources and early product information which is evaluated in the dedicated KABUL CYBER PARK test lab

Web Designing and Hosting

We are a UK Enterprise accredited Web Design and software development consultant as well as an Investor in people. The company is also an authorized and trained reseller for the majority of the leading hardware and software brands, and with over 40 years of combined experience working within the Information Technology sector we do know what we are talking about.

Put simply, we can source and supply the hardware and software you need, install and configure the hardware and software you need and then provide ongoing technical support on the hardware and software you need.

Managing your IT requirements can be a stressful and time consuming project. Here at Kabul Cyber Park, we understand the importance of choosing the right IT solution; whether you are just starting out or needing some IT assistance, let KabulCyberPark Inc. take the stress away.

The key to our continued success is an appreciation and understanding of our client's needs and our approachable, knowledgeable and highly qualified IT professionals who provide an unrivalled level of service.

Services List

We offer a comprehensive range of IT services, including:

- The supply, installation and configuration of a wide range of computing equipment and software;
- The installation and maintenance of wired and wireless networks;
- The supply, installation and ongoing support of computers, from desktops to file servers;
- Internet access;
- The support and maintenance of hardware and software on both a "pay as you go" and a support contract basis;
- Voice over IP (VoIP) telephony;
- Web design.
- Outsourced IT for small business's
- Technical support

Network Design and Support

We can handle everything from network design and installation to on-going maintenance, internet and e-mail solutions to corporate intranets and web design. Whatever your IT requirements, we are here to help initially with advice and then with cost-effective services and solutions.

Our technical team is on hand from 9am-5pm Saturday to Thursday to sort any technical problems you may have. We provide all encompassing maintenance agreements which provide telephone, remote access and engineer on-site visits to keep your company's systems running at their best.

Whether you have five desktop users, or 500, rely on in-house technical support, on external suppliers, or a combination of the two, cost effective IT management is the cornerstone of successful business.

We understand your business challenges and our suite of market-leading solutions help address them. We are in the unique position of being able to help you evaluate a number of solutions and advise you on the best solution for your business.

Consultancy Services

For almost two decades, Kabul Cyber Park has offered a range of professional consultancy services with the following focus:

1. IT Process Improvement and Quality Management

Applying Software Inspections

IT Process Improvement and Quality Management

Kabul Cyber Park has introduced many companies to the principles and practices of software and services quality improvement including ISO 9001 and CMM. This has been done through courses, seminars and consultancy.

Our expertise in this field was recognized when we were invited to serve on the Software Quality Forum set up by the Irish Government to advice on a strategy for the maintenance of a superior level of quality by Irish software developers.

Applying Software Inspections

Kabul Cyber Park Inc consultants are specialists in applying software inspections.

Kabul Cyber Park Inc has taught this powerful defect-detection technique to many organizations through training courses and one-to-one consultancy.

Independent Project Quality Audits

Kabul Cyber Park Inc offer an independent project quality audit service which can provide project sponsors with the assurance that a project is likely to meet its objectives - and that, if danger signals do occur, they will be made visible to the sponsors immediately. In short, our project quality audit service offers the project sponsor the comfort of having independent "eyes and ears" on the project team.

Software Development Services

Kabul Cyber Park Inc has a pool of skilled software engineers available for assignments. The expertise offered includes:

1. Systems analysis
2. Requirements specification
